Subject: RE: Dates for CA UIC meeting with State

Let's try for Feb. 20 if at all possible, since we'll need the time immediately afterwards to formulate a response to the plan in early March, perhaps with additional input needed from the State. For me, the earlier the better on Feb. 20 since I need to be at a lunchtime meeting near Civic Center with interagency partners re Bay sediments. If Feb. 20 is impossible for folks, I don't know if I can be here in person on Feb. 27, but would figure out a way to call in if I can't be here.

We're still trying to pin down a date to meet with the State to go over their plan. What they have available is Feb 20th (10 or 10:30am start) and Feb 27th (2pm start). From the looks of calendars, neither of these is ideal, but I wanted to check in to see if we can make the Feb 20th slot work. We would ask them to come here. Let me know. Thanks. David
